MICRO FEEDER MACHINE

Adding Biotech Flour Improvers uniformly during the process of milling is a critical job, which is done efficiently and accurately by the **MICRO FEEDER MACHINE** at a uniform rate.

Our **MICRO FEEDER MACHINES** are manufactured with high quality material to ensure durability.

They are compact in size and are easy to install and operate. The Machine can provide uninterrupted service throughout the day with a continuous 24 hours running capacity.

MICRO FEEDER MACHINES are available in different material as per requirement, such as:

- Stainless steel.
- Mild steel.
- etc.

MICRO FEEDER MACHINE

Micro Feeder Machine is used to feed the Improver in Flour during the milling process. The machine is very handy, easy to use and install. The machine is made of stainless steel for longer durability so that the improver can be mixed appropriately in the flour.

The key features of our Machine are as under:

- The Machine is Compact in size, requires less space and is easy to install.
- Dimensions: Length 2.5 Ft: Breadth 2 Ft: Height 3 Ft.
- Motor (AC/DC).
- Panel (Electronic Speed Controller).
- Gear Box (30:1 ratio).
- Weight: 60 KG (Approx).
- Convenient design.
- Operates without disturbance for longer duration.

BIOTECH FOODS

*Assuring you of our best services at
all times and looking forward for a
prolonged association with you.*
